

## **7 online blunders – These common mistakes can ruin your computer or invite identity theft**

- 1 Assuming your security software is protecting you
- 2 Accessing an account through an e-mail link
- 3 Using a single password for all online accounts
- 4 Downloading free software
- 5 Thinking your Mac shields you from all risks
- 6 Clicking on a pop-up ad that says your PC is insecure
- 7 Shopping online the same way you do in stores
